

**MWH
Treatment
Limited**

***Policy
Statement***

Care of the environment is central to our business. MWH Treatment is committed to sustainable development and being a responsible business. Our objective is to carry out our activities in such a manner as to minimise the effect on the environment whilst continuing to provide value to our customers. Our policy with regards to waste minimisation is to:

- Apply waste minimisation principles through the operation of an Environmental Management System to office services, design, leakage and networks, construction and operational activities.
- Work with our supply chain and clients to identify reuse and waste minimisation opportunities.
- Increase awareness of waste management and minimisation through training provided to our employees and others who work with us.
- Complete Site Waste Management Plans for our construction projects.
- Remove all waste in accordance with our statutory duties and procedures.
- As far as practicable to minimise the environmental impact of plant, equipment and other physical assets for their entire life cycle and subsequent disposal.
- Set objectives and targets for continual improvement on the minimisation of waste.

The Company is committed to following the **Waste Hierarchy**. In order of priority it shall eliminate, reduce, re-use, recycle and recover by:

- Eliminating waste through the use of efficient design.
- Reducing waste by re-using existing structures thereby minimising the consumption of resources and maximising the use of recycled materials;
- Re-using waste produced on and off site in line with national and local legislation;
- Recycling where local facilities are available;
- Recovering energy through incineration or anaerobic methods, wherever that is possible.

Disposal of waste to landfill is seen as a last resort after all other options have been exhausted.

Management are responsible for ensuring that this policy is understood at all levels of the Company and that effective management systems are implemented.

Every employee shall play an active part in supporting MWH Treatment in implementing this policy so that we remain responsible for our actions.

.....  December 2018

Paul Bresnan (MWH Treatment Managing Director)
